FAS-120 Automatic Swing Door Operator

FAS-120 Automatic Swing Door Operator

Technical Data and Operating Conditions

Voltage	AC/220V
Power Frequency	50-60HZ
Rated	65-90w
Fuse protection	2.5 slow moving
Humidity	Relative humidity is not greater than 85%

Features :

Planetary gear reducer using the brushless motor technology, super-quiet operation so that you are using a more perfect and more convenient ; multi-interface, full-functions remote control technology is more two-door interlock, adjustable position feedback and other functions; excellent reliability, durable.

Performance Parameters :

For swing doors : the swinging doors of various materials door width 600 -1200 hao mi

Auto - open angle : 90 degrees the door weight 120 kg

Door hold time : 0.5 - 8 seconds adjustable

Closing speed : 3 - 6 seconds adjustable

Door speed : 3 - 6 seconds adjustable

FAS-120 Type gantry crane also has the following six features:

1. Remote control door closing closure and prohibition
2. Buffer function
3. Automatic overload protection:
4. Lock the door continuously adjustable intensity adjustment functions
5. Intelligent encountered barriers to protect
6. Intelligent over-temperature protection

Host dimensions D 580mm, Width 82mm, Thickness 68mm, Input power static (Maximum) 65- 90W

Power AC220, AC18V/DC20V

Procedures :

Door signal — control lock — door — brakes stop the door — open to maintain — with self- closing
 — Buffer — lock the door

Application

FAS - 120 Applied Machine automatic door market is very wide and can be widely used in access control, building intercom, door sensors, and other systems swing door. That is pushing to open more such functions, the extrapolation into the energy-saving effect is very applicable to people with disabilities out of place! Also widely use in the clean room air shower automatic doors, supermarkets, hospitals, restaurants, private clubs, office building and department stores of public toilets door, hotels, etc.
