

SK-400 Rack Linear Actuator

The SK-400 Electric operator in aluminum with linear rack movement, equipped with electronic limit switch, level of protection IP 30, possibility of connection in parallel, antisturbance capacitor, complete with anodised aluminium bracket and window attachment in galvanised steel.

The rack is in C43 galvanised steel, with square cross section 10x10. The case for the motor unit is in impact resistant ABS, consists of two pieces with a sealing gasket.

It has a power supply cable connected directly inside the operator, and accessories. On request: Rack and accessories in stainless steel.

Technical Data

Dimensions	550mm L
Thrust Power	850N
Stroke Adjustable at	100 - 400mm
Traverse Speed	20mm / sec
Voltage Supply	230v 50Hz AC
Absorbed Current	0.5A
Protection Level	IP 30
Rack	Galvanised Steel
